

Era split and possession common support: Barcelona's conditional gaps

Eras use prior-match style controls. The overlap sample uses same-match style.
Both comparisons are descriptive; trimming changes the population.

2018 separates the reported payment period and first VAR season; it does not identify a payment effect.
Possession support drops 219 of 714 Barcelona rows (31%) and the low-possession side of most matches.
95% season-block CIs with t(G-1) critical values. Sources: ESPN, football-data.co.uk.
